

COLMAC

ADVANCED TECHNOLOGY FOR WATER HEATING

AMBIENT AIR IN

INSTANT HOT WATER OUT
UP TO 176° F (80 °C)

COLD WATER IN

CHILLED AIR OUT

BENEFITS

- **Reduce** water heating costs by up to 80%
- **World's** most energy efficient heat pump
- **Fastest** payback and highest return on investment
- **Longest** product life and industry's best warranty
- **Improved** indoor air quality with chilled air benefit
- **Environmentally** friendly "green" technology
- **Instant** reliable hot water in a single pass
- **100% safety** for sanitary hot water

APPLICATIONS

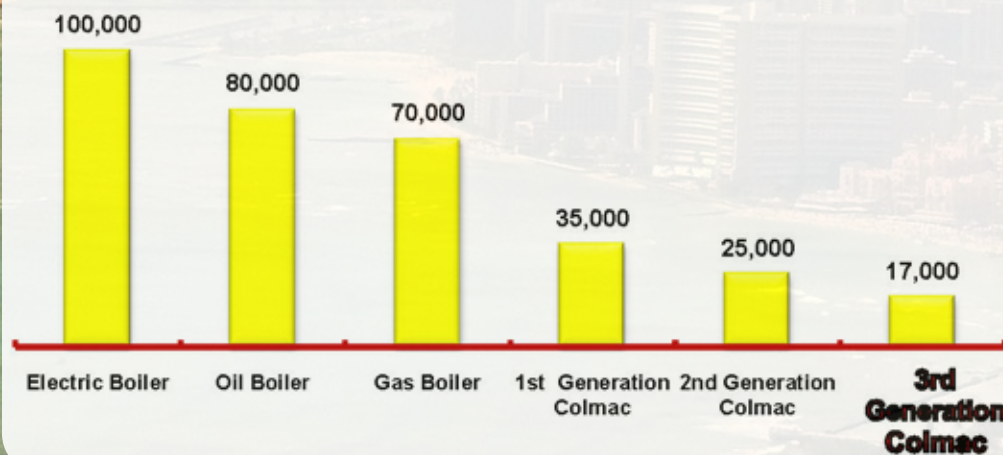

- Hotels
- Condominiums
- Health Clubs
- Hospitals
- Schools
- Restaurants
- Kitchens
- Laundries

SANITARY HOT WATER COMPLIANCE UNDER PUBLIC HEALTH REGULATIONS

THE COLMAC ADVANTAGE:

- 3rd Generation precision engineering for “single-pass” hot water
- Unsurpassed energy efficiency ratings
- Highest quality components for reliability and durability
- Industry’s only heat pump capable of producing 176°F (80°C) hot water on demand
- World's only heat pump for sanitary hot water without boiler assistance
- Only Colmac can provide hot water storage without layers of dilution
