

AccuCounter® Light Frames

Automated soil counting for all types of soiled items including shop towels, uniforms, medical and restaurant linens.

- Items can be collected directly into a sling cart or onto a conveyor belt
- Light frames may be configured with one or multiple frames per workstation
- Multiple languages available. Touch screen convenience.
- Resettable, on-screen sling counter
- Solid-state, fanless PC and LCD industrial touch screen monitor
- Counts are recorded at the Host computer and can be exported to any route accounting system
- Tracking reports by Customer, Ticket, Item or Operator
- Let us convert your current equipment such as IPC SmartCount, Karco belt driven and Classomat systems

Individual Station Light Frame

Bulk Light Frame Option

- Ideal for counting many of a few different type items
- One or more items can be assigned to different frames or “chutes”
- Operator is alerted when sling is full and needs to be changed
- Alerts when chute assignments change based on customer account
- Designed for bulk accounts such as Hotel/Motel, Healthcare and Shop Towel/Industrial
- Multiple frames assigned to one touch-screen control station

Items are counted and collected directly into slings. An alarm indicates when the sling is full.

Item	Qty	Sling

... Start with accuracy, finish with quality

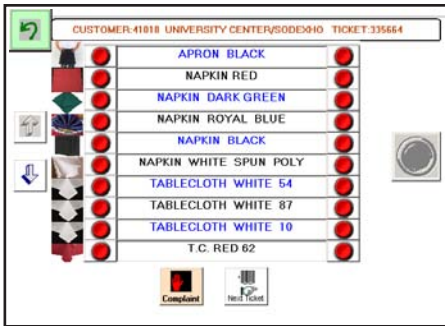

Multiple languages to select from using the convenient touch screen.

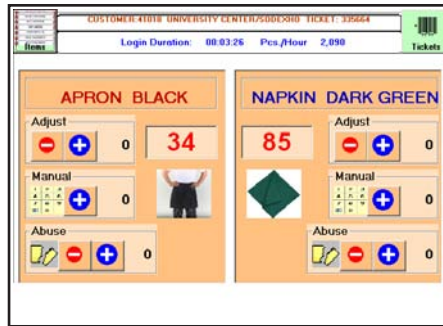

An operator ID is entered for tracking productivity and control.

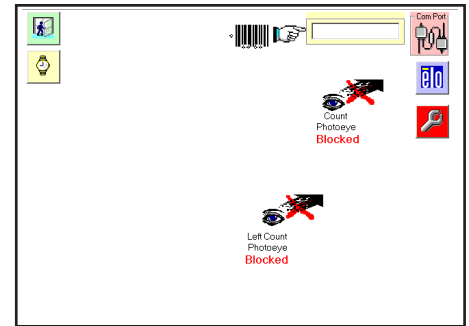

A ticket or invoice number is scanned with the bar code reader or entered manually to access a customer's account.

An item to be counted is selected from the list of items on the soil ticket.

The count screen displays current piece count and allows for adjustments and tracking abused items.

The maintenance screen displays real-time status of sensors and tests bar code reader integrity.

Features	Benefits
Interfaces with route accounting software and invoicing modules	Keeps dirty soil tickets out of your office and eliminates unnecessary data-input labor.
Utilizes touch screens	Increases accuracy, operator productivity.
Quick disconnect light arrays	Detects even the smallest item.
